

IT PLUS CONTROL BOX 600X1200X600MM SLW60

Description

Inspectable infiltration crate manufactured from thermoplastic material, consisting of a fully open plastic structure that can be assembled modularly—both horizontally and vertically—into a stable underground structure (basin) for the buffering and/or infiltration of water into the soil.

- The IT Plus Controlbox is made of PP (polypropylene).
- The IT Plus Controlbox is fully inspectable along its entire length and has a minimum free internal opening of 500 mm.
- The IT Plus Controlbox system is 100% compatible with the IT Plus Variobox and the IT Plus Vivo Control, offering numerous options for maintenance and inspection.

Advantages

- Three-dimensional water permeability
- Connection and linking possibilities on all sides
- Storage capacity: 95%
- Permeability coefficient > 63%
- 100% recyclable

Application

The IT Plus Controlbox is specifically designed for use in large-scale, engineered applications. The system forms part of a sustainable water management solution and is intended for the storage, conveyance and infiltration of rainwater, whether originating from roofs, roads, car parks or any other paved surface.

IT PLUS CONTROL BOX 600X1200X600MM SLW60

Characteristics

Characteristic	Value	Characteristic	Value
Article code	<u>11919</u>	Gross volume (L)	432
Commercial Code	CONTROL12	Net volume (L)	410
Raw material	PP	Inspectable	Yes
Width (mm)	600	Connection options	110, 125, 160, 200, 315, 400, 500
Length (mm)	1200	Weight (kg)	20,72
Height (mm)	600
