

Description

A manhole cover made of polyurethane reinforced with glass fibres, with a corresponding frame made of glass fibre-reinforced polypropylene.

Advantages

- Watertight thanks to a double hydraulic system in the frame
- Load-bearing capacity of 400 kN in accordance with EN 124, class D400
- Anti-slip waffle pattern for optimised noise reduction
- Double siphoning system
- Four-point locking system

Characteristics

Characteristic	Value	Characteristic	Value
Article code	<u>1767</u>	Certificate	Uncertified
Commercial Code	HE800RD	Load class	D400
Raw material	Polyurethane reinforced with fibreglass	Outer diameter Ø (mm)	870
Shape	Round	Clear opening diameter Ø (mm)	700
Lid properties	Watertight	Height (mm)	102
