

'FORMSET CABLE GUIDE 2X110;1X75;2X50MM L=40CM'

Description

The energy kit or formwork set is used as an integrated element in the foundation. This explains its standard widths of 30/35/40 cm. It functions as a service entry element for utility connections and is mainly applied in basement construction.

Advantages

- User-friendly
- Gas- and watertight
- Easy accessibility thanks to large diameters
- Anchored by means of a specially designed clamping system
- Equipped with clear pictograms

Characteristics

Characteristic	Value
Article code	17747
Commercial Code	BEKIST40
Raw material	PVC
Height (mm)	400
Diameter Ø (mm)	110
Diameter Ø 2 (mm)	75
Diameter Ø 3 (mm)	50
