

EPDM PE DRAINAGE OUTLET 110MM 90° W/FLAP L600MM

Description

This high-quality rainwater outlet consists of an HDPE pipe and a round 1 mm thick EPDM flange. Using a patented expansion system, the flange is securely fixed to the HDPE pipe. As the flange is pre-attached, fast and efficient installation is guaranteed — all that is required is fixing the outlet to the roof. This product is therefore suitable for both new build and renovation projects. As the dimensions precisely match existing couplings, it can be perfectly connected to the existing drainage channel.

Characteristics

Characteristic	Value	Characteristic	Value
Article code	<u>18566</u>	Pipe diameter (mm)	110
Commercial Code	TAP110L	Length (mm)	600
Type of product	Outlet pipe with EPDM flap	Slab diameter (mm)	370
Raw material	EPDM PE	Wall thickness (mm)	4,30
Degrees (°)	90
