

ABOVE-GROUND STORAGE TANK GREEN 2000L

Description

This 2000-litre above-ground water tank is made of high-quality polyethylene. As a result, these rainwater tanks are durable, rot-proof and resistant to UV radiation. The tank can therefore be installed both indoors and outdoors. Despite its compact footprint, it allows a substantial amount of water to be stored. These tanks are ideally suited for the storage of rainwater for technical use in the home or garden, as well as for professional applications. Multiple tanks can be interconnected to achieve a larger storage volume.

Advantages

- Made from high-quality UV-resistant material
- Robust and lightweight HDPE
- Possibility to interconnect multiple rainwater tanks
- Suitable for the storage of drinking water
- Time-saving: direct installation, no excavation required

Characteristics

Characteristic	Value	Characteristic	Value
Article code	<u>20812</u>	Length (mm)	2020
Commercial Code	STOCKBV2000Z	Width (mm)	880
Raw material	HDPE	Height (mm)	1650
Colour	Green	Weight (kg)	92
Volume (l)	2000
