

Description

PP rainwater filter with removable filter element. Rainwater enters via the inlet and passes through the mesh into the sand filter. From there, the purified water flows into the rainwater tank. Debris retained in the filter is flushed away during heavy rainfall or when the filter element is removed and cleaned.

Advantages

- Limited fall of 6.5 cm.
- Easy access and handling.
- Lightweight design.
- Large filter surface area.
- Simple and safe maintenance.
- Suitable for all pitched roof surfaces (tiles or slates) and most flat roofs.

Characteristics

Characteristic	Value	Characteristic	Value
Article code	21879	Filter	Stainless steel
Commercial Code	DEVABOXIM	Mesh size (mm)	1
Raw material	PP	Max. roofsurface (m ²)	185
Length (mm)	540	Diameter Ø (mm)	110
Width (mm)	467	Diameter Ø 2 (mm)	125
Height (mm)	270
