

HDPE GRASS/GRAVEL MAT TRUDIDAL A 120X80X5

Advantages

- Efficient infiltration of surface rainwater thanks to a 90% open structure
- Equipped with internal expansion joints to absorb thermal and mechanical stresses
- Easy and fast installation
- Frost- and UV-resistant
- Made from 100% recycled material, 100% recyclable
- Integrated fixing system
- Very high biological and chemical resistance
- Supplied with anchoring pins (20 mm)
- Available with marking caps
- Equipped with internal settlement joints

Application

Suitable for the construction of car parks, access roads, walkways, gardens, terraces, cemeteries, helipads, reinforcement of road edges and verges, etc.

HDPE GRASS/GRAVEL MAT TRUDIDAL A 120X80X5

Characteristics

Characteristic	Value	Characteristic	Value
Article code	<u>27000</u>	Compressive strength (empty)	155 t/m ²
Commercial Code	GRASPTVA120GRIND	Diameter cel (mm)	60
Raw material	HDPE	Length (mm)	1200
Colour	Black	Width (mm)	800
Certificate	Copro 674/28	Height (mm)	50
UV resistant	Yes	Weight (kg)	4,30
