

RUBBER RING FORSHEDA 910

Description

Rubber sealing for the flexible connection of pipes to concrete manholes. Suitable for both precast openings and core-drilled holes.

Advantages

- Thanks to its triple-lip design, the connection between pipe and manhole is facilitated. It also provides excellent resistance to lateral shear loads while allowing a large angular deflection.
- The wide range of available sizes ensures a watertight connection for almost any pipe diameter and material.

Characteristics

Characteristic	Value	Characteristic	Value
Raw material	EPDM	Certificate	CE
Colour	Black	Certificate norm	EN 681-1
