

PE drainage outlet with roofing flap

Description

This high-quality rainwater outlet consists of a durable HDPE pipe with a round 4 mm bituminous flange. Thanks to the patented expansion system, the flange is securely and watertightly bonded to the pipe. The pre-assembled connection ensures fast and efficient installation, both for new builds and renovation projects. The dimensions are perfectly matched to standard couplings, allowing seamless connection to the existing drainage system.

Advantages

- Patented expansion system for maximum reliability
- Pre-assembled flange for fast and efficient installation
- Suitable for both new build and renovation
- Perfect fit with standard couplings for easy connection

Characteristics

Characteristic	Value	Characteristic	Value
Raw material	Bitumen / PE	Shape	Round
