

DRAINIX TRAFFIC 20CM 1200X600X200

Description

Drainix® Traffic is a cast-on-site reinforced grass paver and represents the perfect combination of a classic plastic (lightweight) grass paver and a concrete (strength) grass paver. With a height of 20 cm, double reinforcement is possible. This makes Drainix® Traffic suitable for very heavy loads such as container parks, road infrastructure and heavy truck traffic.

Advantages

- Wear-resistant and strong: creates one large infiltrating concrete surface with reinforcement
- Can be cast on a slope
- Suitable for use as verge reinforcement
- User-friendly installation thanks to its low weight
- Can be filled with topsoil or gravel
- Resistant to heavy traffic, even suitable for container storage
- Requires 35% less concrete compared to a traditional concrete slab

Characteristics

Characteristic	Value	Characteristic	Value
Article code	<u>63617</u>	Length (mm)	1200
Commercial Code	DRAINIX20	Width (mm)	600
Raw material	PP	Height (mm)	200
Colour	Black	Concrete volume per m ²	0,124m ³
UV resistant	Yes
