

HDPE CABLE PROTECTION PIPE SDR17.6

Description

HDPE cable protection pipes are used to protect cables against various external influences. These pipes are commonly applied in the infrastructure of telecommunications networks, power distribution networks and data networks.

The use of these pipes helps extend the service life of cables, reduces maintenance costs and improves the overall reliability of the network. Our HDPE cable protection pipes are available in various diameters and wall thicknesses, depending on the specific application and the size of the cables they are designed to accommodate.

Advantages

- Strong and flexible material: the pipes can be easily bent without breaking
- Resistant to corrosion, frost and UV radiation; suitable for both underground and above-ground use
- Smooth inner surface reduces friction when pulling cables
- Durable and environmentally friendly: HDPE has a long service life and is recyclable

Application

These cable protection pipes are suitable for open-trench installation, ploughing and milling, as well as for installation by means of horizontal directional drilling (HDD).

HDPE CABLE PROTECTION PIPE SDR17.6

Characteristics

Characteristic	Value	Characteristic	Value
Raw material	HDPE	SDR value	SDR17.6
Colour	Black
