

NIDAGRAVEL 140 2.40X1.20M H40 WHITE 4.0kN/M²

Advantages

- Efficient infiltration of surface rainwater thanks to open spaces
- Easy and fast installation
- Equipped with thermally bonded geotextile to prevent the growth of weeds and plant roots
- High compressive strength
- Resistant to UV radiation and frost
- Can be cut to size
- Installation without fixings
- Made from recyclable plastic

Application

For the construction of stable, durable and permeable pavements, terraces, driveways, etc.

Characteristics

Characteristic	Value	Characteristic	Value
Article code	<u>9800</u>	Compressive strength (full)	400 t/m²
Commercial Code	NIDAGRAVEL	Diameter cel (mm)	50
Raw material	PP	Length (mm)	2400
Colour	White	Width (mm)	1200
UV resistant	Yes	Height (mm)	40
Compressive strength (empty)	40 t/m²	Weight (kg)	5,18
